# TANKMETAL

## COMPANY

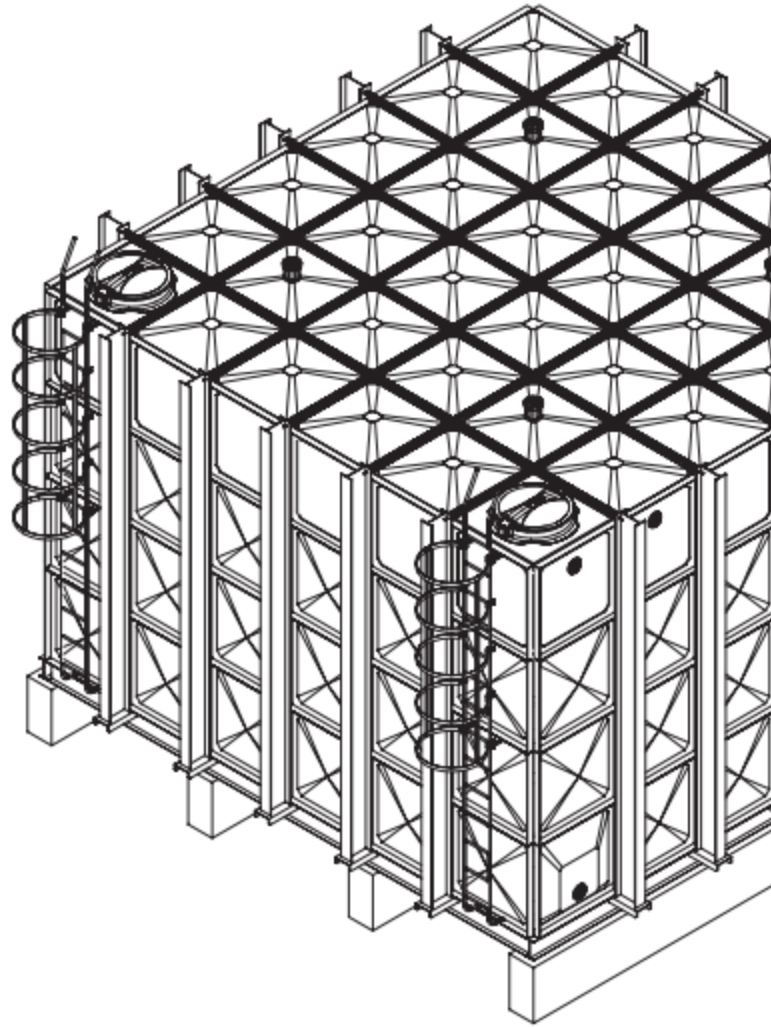

---

'Tankmetal' is into the business of manufacturing and supplying the finest range of GRP Panel tank accessories & fasteners across the globe. Our range of quality accessories and tools, customization facility, mass production ability & prompt service has helped us to cater to the Panel tank industry across many countries. We provide all types of internal and external reinforcements for GRP Panel Tanks in Stainless steel and Hot Dip Galvanized material.

We are equipped with advanced machinery, experienced staff & a network of appropriate suppliers. This results in a superior efficiency of production and makes it possible for us to obtain high volume production capacity and independent production procedures. We're continuously investing in technologies and facilities and have largely benefited from a significant investment in both our people and systems.

We offer all our products under our brand name **'TANKMETAL'**

SECURE YOUR  
GRP PANEL  
TANKS WITH  
TANKMETAL  
ACCESSORIES

## EXPERTISE

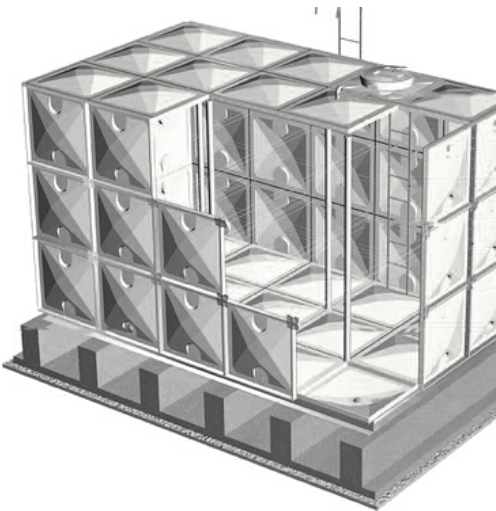

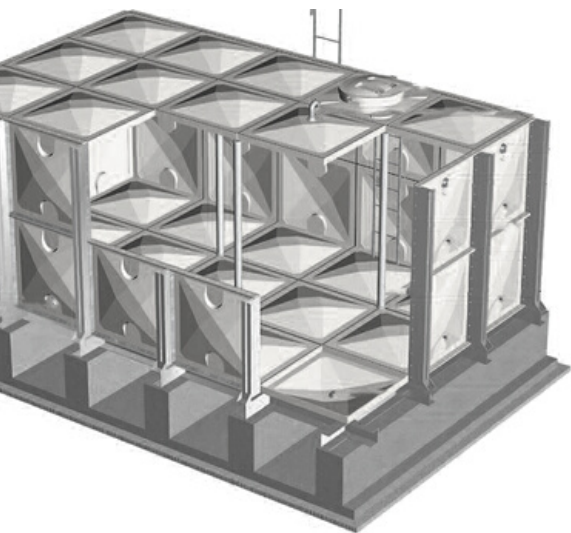

---

We work actively with our suppliers, workers and management to seek ways to promote continuous quality production. Hence, we keep ready stock of almost all of our products in various material grade to avoid long lead times & urgent delivery hassles.

Discuss your requirements with our team to help us forecast your ordering schedule and stock the products required by you for your next delivery. So, the next time you're ordering tank fittings from Tankmetal, just count the cost savings and shipping time for delivery!

# INTERNAL REINFORCEMENT

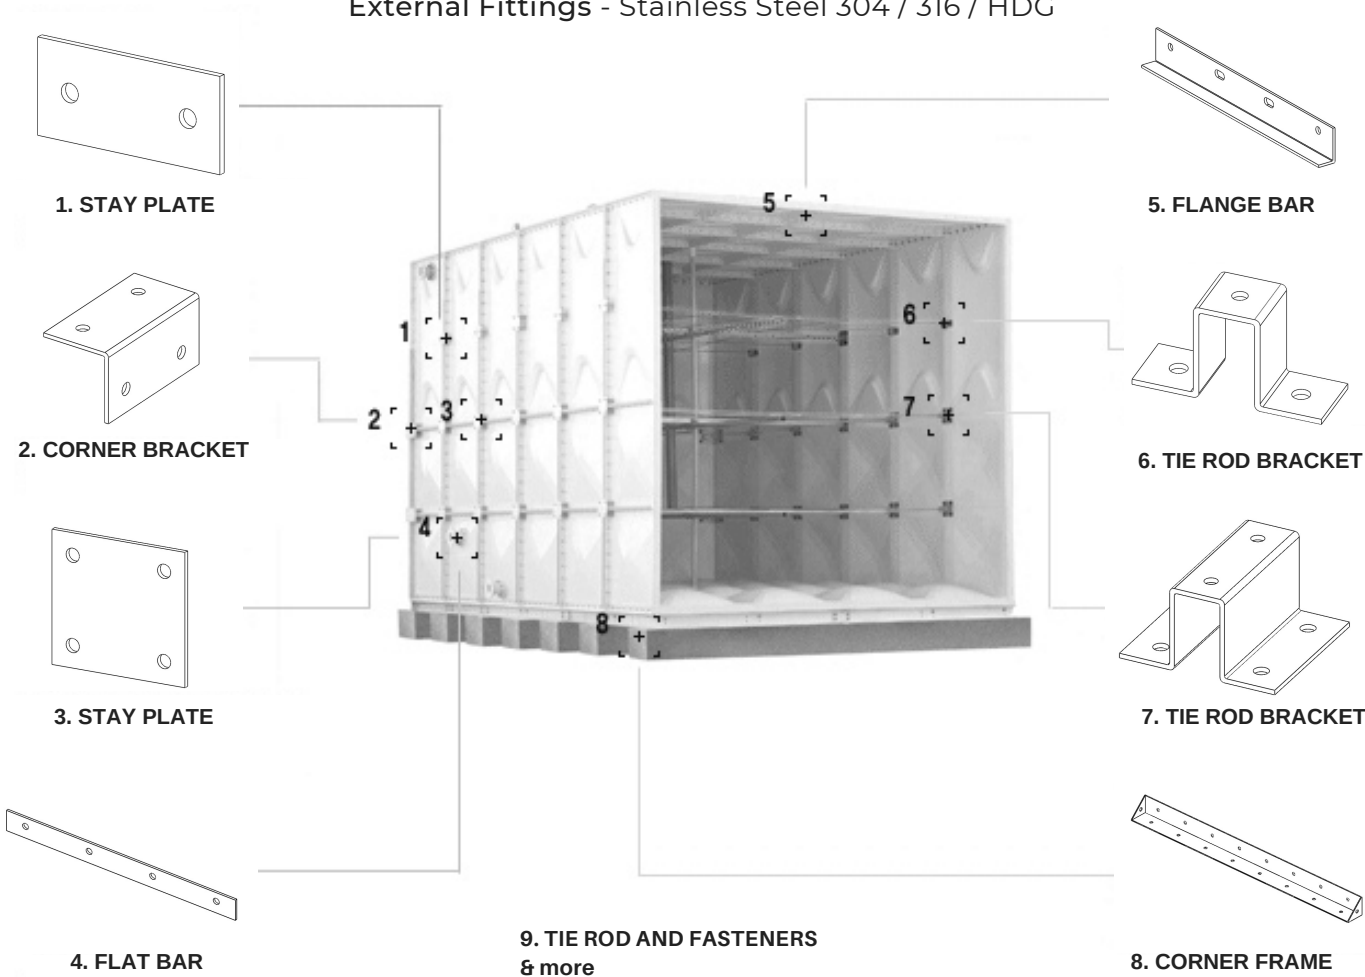

In the internal installation method, bracing is done internally by putting stainless steel tie rods. Tie rods are installed in a particular place where corners of four side panels meet together and are fastened with the help of brackets & stay plates. Tankmetal manufactures a range of products to secure the tanks internally.

# EXTERNAL REINFORCEMENT

In external bracing, strength is provided to the panel tank by putting structural channels at every joint vertically and it is secured from two places, at the bottom of the tank with steel skid and at the top, it is fastened with Tie rods to avoid displacement of the structural channels. Tankmetal manufactures a range of products to secure the tanks externally.

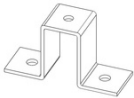

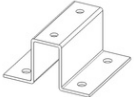

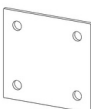

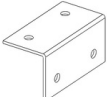

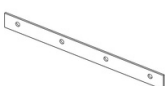

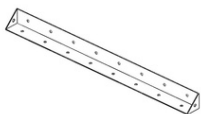

Internal Fittings - Stainless Steel 304 / 316 / 316L  
External Fittings - Stainless Steel 304 / 316 / HDG

## INTERNAL & EXTERNAL REINFORCEMENTS

Our in-house engineers work in order to design & manufacture the perfect product for all the standard as well as customized application thereby offering a comprehensive range of reinforcements to add to the interior or the exterior of your tank. Following are the list of reinforcements offered by Tankmetal:

Product Name	Product Image	Material Quality	Product Description
Tie Rod Bracket (Omega Bracket)		SS304 & SS316/316L	Used for internal bracing with one tie rods.
Tie Rod Bracket (Omega Bracket)		SS304 & SS316/316L	Used for internal bracing with two tie rods.
Stay Plate (Flat Bracket)		SS 304/316/316L & HDG	Used for bracing single tie rod.
Stay Plate (Flat Bracket)		SS 304/316/316L & HDG	Used for bracing two tie rods.
Corner Bracket		SS304 & SS316/316L	Used internally during partition.
Flange Bar (L Angle Bar)		SS 304/316/316L & HDG	Comes in multiple lengths.
Flat Bar		SS 304/316/316L & HDG	Comes in multiple lengths.
Tie Rod (Threaded Rod)		SS 304/316/316L & HDG	As per various size & capacity of tank.
Connector (Long Nut)		SS 304/316/316L & HDG	As per tie rod size.
Fasteners (Bolt, Nut & Washer)		SS 304/316/316L & HDG	As required.
Corner Frame		HDG	Comes in multiple lengths.
Anchor Bracket		HDG	For fixing base structure to concrete.
Skid base		HDG	As per various size & capacity of tank.
